

Top-Fill Drinker

Spare float included.

Keep it in a safe place just in case.
If you lose any parts please contact us
directly for replacements.

Our top-fill drinker is very easy to use but there are a few simple things to remember when assembling it.

- 1 Ensure the float is positioned with 'This side up' facing upwards in the middle of the trough.
- 2 The red 'bung' should be inserted flat end first in the bottom of the reservoir so that the round end is visible.
- 3 The black filter inside the reservoir should fit snugly into the centre hole inside at the bottom (be careful not to throw it away accidentally!)

Once assembled, all you need to do is lift the lid and top up with water - it couldn't be easier!

Check drinkers regularly especially in frosty or hot conditions.

Clean regularly with hot soapy water.

We recommend standing the drinker on level ground, hanging it when full may cause the reservoir to warp.
